

# HYDRA SPRAY®

COMMERCIAL BUILT PICK-UP SPRAYERS

The GVM Hydra Spray was designed to offer versatility and maneuverability to custom applicators, co-ops and farmers. The Hydra Spray is offered from the factory on the Ford F-550 chassis. This provides operators a narrow, mechanical drive machine with a tight turning radius and comfortable road travel.

The design of the Hydra Spray will help you get into areas larger application equipment cannot navigate into, including pastures, narrow gateways, and small farm roads. It's tire options allow the Hydra Spray to do both pre- and post-emergence work for liquid applications.
