

FOR IMMEDIATE RELEASE

GVM Introduces the MAKO 440
We're Confident...You'll Be Hooked...Again

East Berlin, PA (USA) – February 9, 2016 – Another Mako joins the family. GVM Inc. is proud to announce the official launch of the new Mako 440 sprayer that will take place at the National Farm Machinery Show in Louisville, Kentucky this February.

With 36 inches of clearance, the Mako 440 will accommodate farmers and applicators who favor low center of gravity. Mark Anderson, President and Owner of GVM Inc., believes the new product will satisfy customers tremendously in the fields. He states, “What’s great about this new machine is that it provides comfort and stability for any user. Farmers and applicators all have different preferences and we are eager to provide another clearance option.”

The smallest, most compact self-propelled sprayer in the marketplace; the Mako is the perfect machine to get into fields early when grounds are wet. The Mako features a 400 gallon product tank, multiple boom options, 36-46 inches of crop clearance, a light footprint, and a tight turning radius. It is simple enough for first time applicators, yet smart enough for pros.
